Звіт
до лабораторної роботи № 11
з дисципліни
Операційні системи
на тему:
“Робота з бібліотеками в ОС Linux”

Виконав: студент КН-217

Ратушняк Денис

Прийняв: доцент каф. СШІ

Кривенчук Ю. П.

Мета роботи: Ознайомитися з бібліотеками в ОС Linux. Навчитися реалізовувати статичні та динамічно-зв'язувані бібліотеки.

Завдання

1. [Макс. Складність 2] Модифікувати код лабораторної роботи №2 для виконання під OS Linux.

Код програми func.cpp

```
#include <bits/stdc++.h>
using namespace std;
typedef long long ll;
typedef vector< vector<ll> > matrix;
#include "library.h"
#include <pthread.h>
#include <semaphore.h>

typedef long double ld;

//HERE YOU CAN CHANGE INPUT
const int TOTAL_THREADS = 100;
const int MAX_SEM_COUNT = 10;
string version = "10000_10000_10000";

ll type_of_task = 2;
ll low_priority_thread = 3;
ll high_priority_thread = 7;

//HERE YOU CAN CHANGE INPUT

typedef struct MyData
{
    int startx, starty, step, type;
    int threadNum;
